

Warning: *Never* use more than two Upsize Kits with your Swing Set Frame. Creating a size larger than L will dramatically reduce the structural integrity of the design and may cause injury.

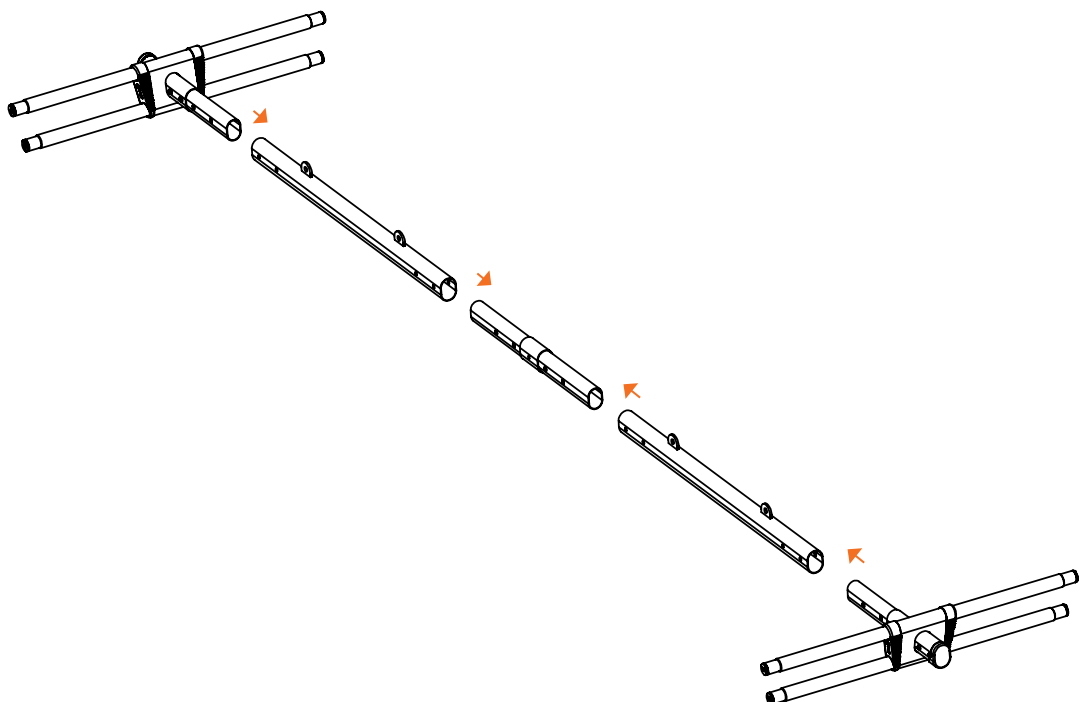

STEP | 1

Remove any swings from your swing set and any Swing Rails from any Swing Joiners or End Joiners.

STEP | 2

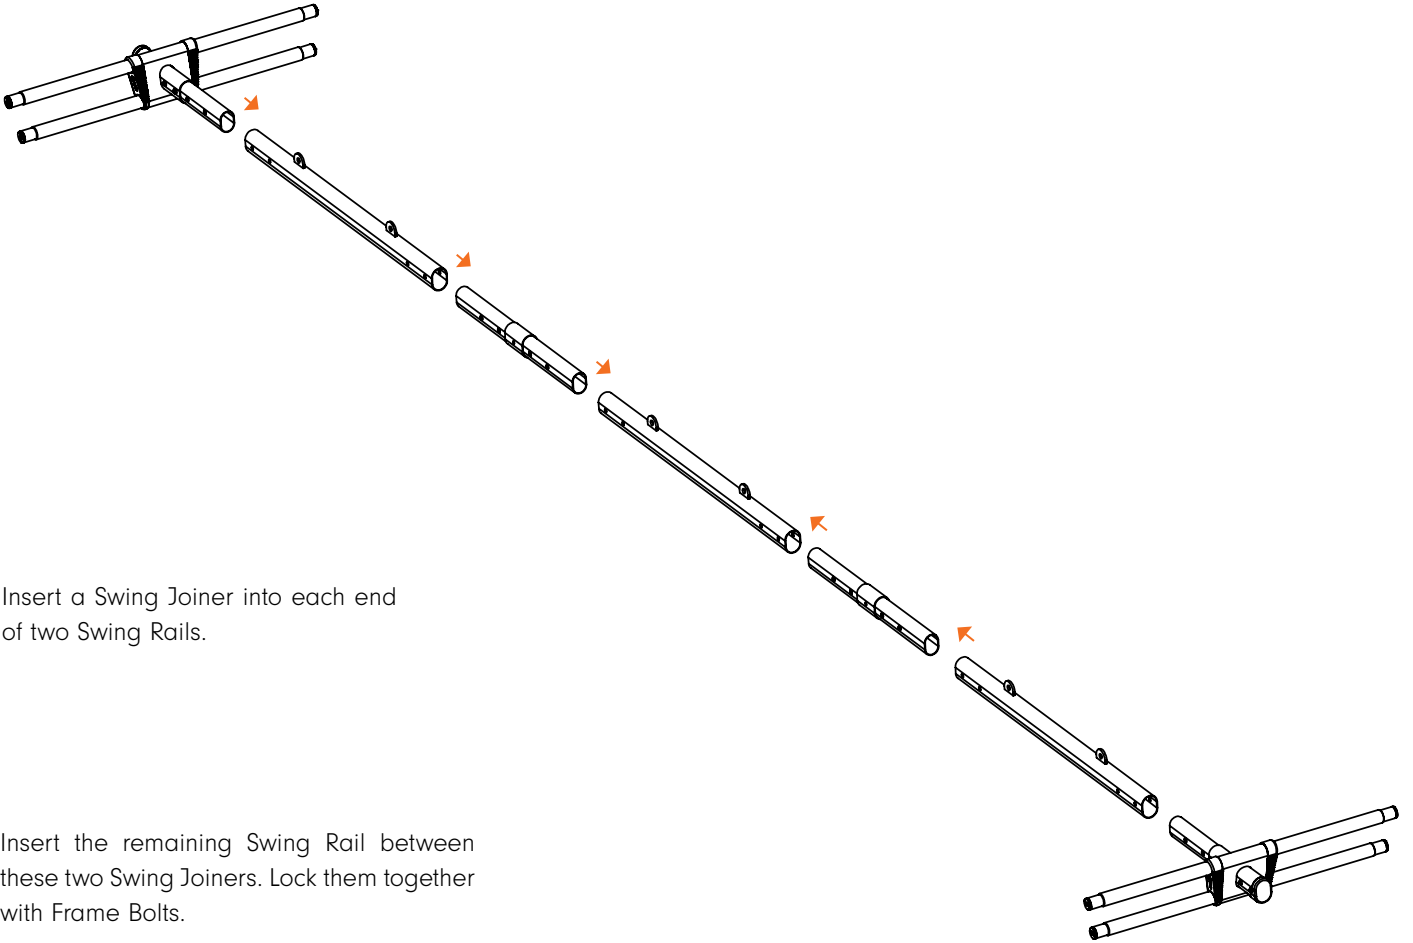

TO CREATE 2 SWING SLOTS:

Insert one shared Swing Joiner into the ends of two Swing Rails. Lock them together with Frame Bolts.

STEP | 2

IF CREATE 3 SWING SLOTS:

Insert a Swing Joiner into each end of two Swing Rails.

Insert the remaining Swing Rail between these two Swing Joiners. Lock them together with Frame Bolts.

CONGRATULATIONS!

You have upsized your swing set frame.
